

“Speed Up Your PC Today” Tips and more...

(share this guide with your family and friends – email it to them right now!)

Dear Friends,

Here is your personal copy of the Speed Up Your PC Today - Tips and more...

- a few short steps for keeping your computer running well -
- less computer headaches –
- less computer hassles –
- and will save you time and money -
- and YOU can do this!!

Ok – Here we go...

This is a crash course on the basics of sound computer care and maintenance.

The following are my personal recommendations based on my own experiences

but,

keep in mind, these are just the basics.

First, I want to tell you that all the links in this document are **100% safe to click on and they are here for your convenience** - (i.e. to save you time searching and wasting money). I do get a small commission if you click on them and purchase something. By doing so, you will allow me to continue to bring you more great ideas in the future. So thanks for your support. (**This guide has a real value of \$299 – it’s my gift to you.**)

In the interest of being brief, please continue and read this quick start guide –

And Yes...YOU can do this!!!!

Speed Your PC Today - Tips and more...

Ready? – OK, the first tip is first for a reason >>> it’s the most important.

1. **Backup Your Stuff** – **YES, do it now** – because if everything goes to hell-in-a-hand-basket, (it’s something my Grandfather would say - not sure what that really means but it sounds bad) - at least your Stuff is safe somewhere else.

If you’re like me - you forget to do things like backing up Your Stuff – everyday.
So automate this task in your life. It’s easy...I’ll show you how.

Subscribe to an on-line data backup service – they are all safe and reliable.

Best of all – these services are AUTOMATED! Set it and forget!

My Favorite Backup Service today is called www.Carbonite.com.

It’s a mere \$54 per YEAR for unlimited automatic backup. Well worth it!

**(Did I say “UNLIMITED” – Yes – you can backup
EVERYTHING!)**

You can try www.Carbonite.com FREE for 15 days,
Risk-free. **No credit card required.**

Try www.Carbonite.com today – Easy to setup –
Easy to learn – [click here and sign up now.](#)

**DO 1st - Watch my easy, step-by-step, setup video at
www.SpeedUpYourPCToday.com.**

(share this guide with your family and friends – email it to them right now!)

2. **Next – you must keep your information safe from Predators** by making sure you have:
- up-to-date **Anti-Virus** and
 - **Anti-Spyware** software AND
 - a **Desktop Firewall** running.
- (FYI – these 3 pieces of software bundled/sold together are usually referred to as “**Internet Security**” software.)

You need all three for a good defense. Nothing will make you 100% safe, but Internet Security software will give you a fighting chance.

Most legitimate Internet Security packages will do the job and will work fine for you. But many of the popular ones like Norton 360 and McAfee are **bloated with too many features for most users and thus significantly slow your PC down.**

Yes, there are free tools out there but, for most folks, buying a quality Internet Security package is much easier for them to deal with....less user headaches in the long run...and, of course, will provide better protection.

My Favorite Internet Security package is “**AVG – Internet Security**”. The company who sells AVG boasts that it does not significantly slow you pc down and it’s reasonably priced...about \$54 per year.

[Click here and buy AVG – Internet Security now.](#)

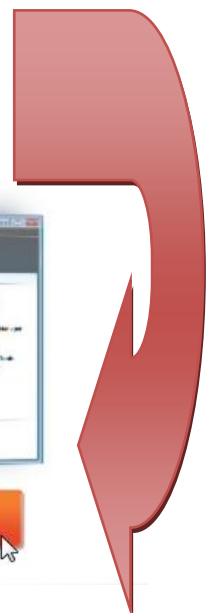

DOWNLOAD AVG'S AWARD-WINNING PROTECTION FOR FREE!

Ready for worry-free surfing, searching, shopping, banking and socializing? Then [download AVG Internet Security 2011](#) and stay protected **for 30 days**.

You'll be able to:

- Shop and bank with confidence
- Download and exchange files without risk
- Stay protected on social networks
- Block spammers and scammers
- Identify malicious websites before you visit them
- Eliminate viruses, worms and Trojans
- Receive technical support

[Download now](#) >

(share this guide with your family and friends – email it to them right now!)

The [AVG – Internet Security](#) product is also pretty easy to navigate and use as compared with many others.

VERY IMPORTANT NOTE: you must uninstall all other Anti-Virus programs prior to installing another one.

DO 1st - Watch my easy, step-by-step, setup video at www.SpeedUpYourPCToday.com.

3. Windows Updates, Windows Updates, Windows Updates!

It is sooooo important that you keep Windows up-to-date, I cannot stress this enough. Keeping Windows up-to-date is essential for maximizing your security defense. It goes hand-in-hand with keeping your Internet Security a defense strong.

Windows can be forced to update by using the Windows Update function found either in the Control Panel or under the Tools Menu in Internet Explorer. Go check this now and force it to update...do it now!

Though the Windows Updates should download and update automatically, you should check for new updates often....just to be safe.

And it's 100% FREE.

4. Tune That PC up! Let’s get some speed.

There are many products for keeping your pc running as fast as it can. Some are called Registry Cleaners or PC Tune Ups, etc. I reviewed some of them on the www.SpeedUpYourPCToday.com web site. If you are using one and getting good results, well great...then stick with it.

But for most users, running the **Disk Clean Up** Program followed by running **Disk Defragmenter**, (which is located on every pc under Programs/Accessories/System Tools) – 100% FREE!

- a. Run **Disk Clean Up** about once per week. Make sure you check off all the boxes to remove all the junk that accumulates on your PC.
- b. Then run **Disk Defragmenter** right after the Disk Clean Up program is complete.
- c. Then **Restart your PC** and you should see a significant speed pickup, especially if you haven’t done this in a while.

OK, for those of you who would like to clean a little deeper, there is one product that I do recommend you buy:

[CLICK HERE>>>](#)   **AVG pc tuneup 2011**
Enjoy a faster running PC
Recover accidentally deleted files 

AVG also makes an excellent PC Tuneup program that is simple to use and should keep your PC running fast!

OK, that’s it! Backup your stuff with Carbonite; Protect your PC with AVG-Internet Security and Tune Up your PC with AVG’s PC TUNEUP. Go to www.SpeedUpYourPCToday.com and watch me install each one...

...you can do this!

Yes, you’re done...see, that was easy! Ok, now that you are taking care of your PC, here are a few cool things you can do with it! Read on...

5. Access your MAC or PC - from anywhere - from any other computer.

Have you ever gone away and suddenly wished you could access your PC at home from, say, the hotel’s computer?

Or you are out at a client with your laptop only to realize you left that important proposal document on your home or work PC?

Well, I use a product called “[GoToMyPC](#)” from Citrix (headquartered in Ft Lauderdale, FL, btw). It is so easy to setup and use, I can’t live without it. I put it on my desktop computer at home and now I can access that computer from ANY other computer, even from the library’s PC or my friend’s laptop.

When you’re done, [GoToMyPC](#) doesn’t leave any information behind on the remote computer you used to access your home host computer so it’s safe and secure to use from anywhere.

You can **try it for 30 days free** – [go to www.GoToMyPC.com](http://www.GoToMyPC.com) – there’s no annual contract requirement so you can try and use it while you’re away and then cancel it if you wish.

[CLICK HERE>>>>](#)

A promotional banner for GoToMyPC. The banner has a white background with a green bar at the bottom. The text "GoToMyPC" is in green at the top left. Below it, "Access Your Mac® or PC from Anywhere" is written in white on the green bar. On the right side of the green bar, "FREE FOR 30 DAYS" is written in white on an orange background.

Summary -

Well, I told you I would be quick. These are just the basics and are recommendations based on my many years of experience.

Most of my recommendations will change over time as to specific products and services I advise you to use but the basic recommendations presented here are sound and current today.

Be careful. This guide along with the use of our web site, www.SpeedUpYourPCToday.com are intended for educational purposes only. There are no warranties expressed or implied. Your particular computer condition may require a unique solution. Solutions here are to be used at your own risk. There is no substitute for hiring a qualified, professional computer technician to solve your particular computer issues.

So thank you for allowing me to share my perspective on how to care for and maintain your computer so that you spend less time and money on fixing it and more time getting your work done.

I hope you enjoyed this FREE guide -

“Speed Your Up Your PC Today – Tips and more...”

Thank you for your time and attention. I’m your host, Jeff Manz, wishing you many hours of happy computing! 😊
